

Chandrika Vishwakarma

Full Stack Developer | MERN Stack Developer | Software Developer

chandrikavishwakarma89@gmail.com | +91-7828513259 | Indore, MP | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Recent graduate B.Tech (Computer Science and Engineering) Full Stack Developer specializing in the MERN stack (MongoDB, Express.js, React.js, Node.js) with 2 completed software development internships. Proficient in React.js, Node.js, MongoDB, REST API development, Redux Toolkit, Context API, JWT authentication, and Role-Based Access Control (RBAC). Strong foundation in data structures, algorithms, OOP, system design, and Agile development. Built and deployed 3 live production web applications on Vercel. Passionate about continuous learning, teamwork, and delivering scalable, secure software.

TECHNICAL SKILLS

Programming Languages: Javascript, TypeScript, C++.

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Redux Toolkit, Context API, Responsive Web Design, Lazy Loading, Code Splitting, Component-Based Architecture.

Backend: Node.js, Express.js, REST API Development, JWT Authentication, Middleware, Error Handling, Input Validation, Secure API Routes, CRUD Operations.

Database: MongoDB, Mongoose ODM, Schema Design, Database Indexing, Query Optimization.

Core Engineering: Data Structures, Algorithms, System Design, Complexity Analysis, OOP, Problem Solving.

Tools: Git, GitHub, VSCode, Postman, npm, Agile, RBAC, Vercel, Debugging, Code Review.

WORK EXPERIENCE

Script Scholar Technology and Solutions | Software Developer Intern | January 2026 - June 2026 | Remote

- Developed 1 production-ready full-stack module (React.js, Node.js, MongoDB); reduced REST API response time by 20% through query optimization and efficient schema design.
- Built 10+ reusable React.js components across 5 pages following component-based architecture; delivered all Agile sprint tasks on time with zero critical production bugs.
- Implemented JWT authentication, input validation, and centralized error handling middleware ensuring robust and maintainable backend architecture.

Bharat Economic Forum | Web Developer Intern | July 2025 - October 2025 | Remote

- Designed 8 fully responsive web pages (React.js, Tailwind CSS); integrated 10+ REST APIs reducing manual content updates by 60% and improving editorial workflow efficiency.
- Improved page load time by 15% using React lazy loading and code splitting; deployed and maintained application on Vercel with zero downtime.

PROJECTS

Flavoro — Food Ordering Web Application React.js, Redux Toolkit, Tailwind CSS, JavaScript ES6 [Live Demo](#) ■

- Architected a fully responsive, production-grade food ordering app with 50+ menu items, dynamic product catalog, real-time cart management, item quantity updates, and smooth order flow using React.js and Tailwind CSS.
- Implemented centralized global state management using Redux Toolkit with dedicated slices for cart, product filtering, and order processing — real-time UI sync across all components without prop drilling. Deployed on Vercel.
- Applied component-based architecture with 10+ reusable UI components, responsive web design across all screen sizes, and React performance best practices including memoization and lazy loading.

Lavendary — E-Commerce Web Application React.js, Context API, Tailwind CSS, JavaScript ES6 [Live Demo](#) ■

- Built a feature-rich frontend e-commerce platform with 30+ products, dynamic product listing, category-based filtering, detailed product pages, and a fully functional cart system — pixel-perfect responsive UI across all devices.
- Implemented efficient cart state management using React Context API — clean component hierarchy, maintainable codebase, and smooth UX optimized for performance without Redux overhead. Deployed on Vercel.

SBMS — Smart Business Management System MongoDB, Express.js, React.js, Node.js, JWT, RBAC, Tailwind CSS [Live Demo](#) ■

- Engineered a full-stack enterprise business management system with role-based dashboards (Admin/Employee) featuring complete modules for Invoices, Customers, Products, Employees, and Orders with real-time CRUD operations.
- Implemented secure JWT authentication, Role-Based Access Control (RBAC), protected REST API routes, Mongoose schema with database indexing for optimized queries, and centralized error handling middleware.
- Designed responsive Tailwind CSS UI with searchable dropdowns, product auto-fill from inventory, customer GST auto-fetch, and intuitive form validation — reducing manual data entry significantly. Deployed on Vercel.

EDUCATION

Malwa Institute of Technology, Indore | B.Tech Computer Science and Engineering | 2022-2026 | CGPA: 7.41

- Coursework: Data Structures & Algorithms, OOP (C/C++), Operating Systems, Computer Networks, DBMS, Software Engineering

New Nageshwar H.S. School | Class 12th - Science | 84% | 2022 Shree D.C. Memorial H.S. School | Class 10th | 88% | 2020

CERTIFICATIONS

Cyber Job Simulation - Deloitte | Practical Cyber Security for Practitioners - NPTEL | C/C++ Programming - Universal Informatics | HTML, CSS, JavaScript, Bootstrap and React.js - Udemy | Python Programming - Udemy
